Course Guide 2024-2025

This course guide gives you information about all courses that may be offered in Clover Park School District's (CPSD) two comprehensive high schools. It also includes information about specific courses offered in CPSD's school of choice that serve students in grades 6-12, Harrison Preparatory School. Harrison Prep may package courses under different names, may integrate and combine courses, and may change the sequence of courses, but its curriculum will still satisfy the same basic requirements as other district courses.

Middle School

General Information

Successful completion of middle school occurs when a student meets the academic expectations of the required program. Students who experience difficulty in doing this may be assigned to Tutorial and/or placed in an academic support course that runs either during the school day, before or after school, or in the summer so that they can receive additional assistance and help in achieving academic success.

Health Examination

A health examination is required of all students participating in interscholastic sports every two years.

High School Credit for Courses Taken in Middle School

New Washington State legislation requires the Clover Park School District to automatically add any high school course taken at the middle school to students' transcripts. Those courses include Algebra and Geometry. The transcript will reflect the credit as well as the letter grade, and the letter grade earned while in middle school will become part of the student's official grade point average (GPA) for high school. According to state law, high school graduation credit for courses taken in 7th or 8th grade may be removed from the high school transcript upon request by the student and parent/guardian prior to the end of the 11th grade. Algebra and Geometry qualify under this provision. (RCW 28A.230.090)

Courses include:

Algebra I, Geometry, Washington State History, Spanish I, Spanish II and Heritage Spanish.

Middle School Course Requirements

- Three years of Language Arts and Social Studies taken in 6th, 7th, and 8th grade.
- Three years of Mathematics taken in 6th, 7th and 8th grade.
- Three years of Science taken in 6th, 7th and 8th grade.
- Three semesters of Physical Education (one semester taken in 6th, 7th and 8th grade).

Lochburn Middle School

Thomas Middle School

Middle School Courses

CTE - Health Sciences

Medical Detectives-89000A/B

Students play the role of real-life medical detectives as they collect and analyze medical data to diagnose diseases. They learn to apply the experimental design process as they work with teammates to creatively think and problem-solve medical issues through hands-on labs and projects. Like healthcare professionals, students learn how to measure and interpret vital signs, perform dissections, investigate disease outbreaks, and explore how an inner breakdown in the human body can lead to dysfunction. This course is part of the STEM, Health Science, and Human Services Career Clusters and encompasses critical 21st Century Skills transferable to all career pathways.

MS Additional Courses

ACADEMIC SEMINAR

Students will work on assignments to make up incomplete work, as well as on current assignments, in Language Arts, Social Studies, Mathematics, and Science. They will also learn organizational and study skills. Students will study for, and take tests, will practice reading, and will complete other assigned tasks to positively impact their academic progress. Students may be matched with Peer Tutors when available to assist them in all of the above tasks.

Prerequisites

Teacher recommendation or self-referral when appropriate; may be required

CONNECTIONS

Connections is designed to advise students in academic, career and social mindsets that prepare students for high school and beyond. The lessons help students develop college and career readiness knowledge and skills through topics such as goal setting, career exploration and college planning. Students acquire a range of skills that directly prepare them to plan for and then succeed at the next stage in their lives. This course is taken in 6th, 7th and 8th grade.

LEADERSHIP

This year course is open to 6th, 7th, and 8th grade students who want to serve the school community while developing their own leadership skills. Leadership skills are both learned in the classroom and refined through practice. Therefore, this course will include two parts: classroom lessons and school projects. Leadership skills such as goal setting, time management, decision making, meeting procedures, communication, organization, public speaking and interpersonal relations will be developed through instructional activities and assessments. Students will put these skills into practice through direct planning and implementation of school projects. Students will reflect on their skill development to identify growth and areas for improvement.

DESIGN AND TECHNOLOGY

Design Technology uses Project Lead The Way - App Creators to introduce students the field of computer science and the concepts of computational thinking, through the creation of mobile apps. Students are challenged to be creative and innovative, as they collaboratively design and develop mobile solutions to engaging, authentic problems. Students experience the positive impact of the application of computer science to society as well as to other disciplines, particularly biomedical science.

The unit provides students opportunities for self-expression. Teams identify a personal or community problem of interest to them that can be solved with a mobile app solution. The problem can address issues such as health and wellness, the environment, school culture, emergency preparedness, education, community service—the options are endless!

MS Math

8TH GRADE MATH

This course addresses the Washington State Learning Standards for Mathematics by developing students' abilities to problem solve, reason, and communicate like mathematicians through the Standards for Mathematical Practice and focusing deeply on the Grade 8 Standards for Mathematical Content.

In 8th Grade, instructional time should focus on four critical areas: (1) deepening knowledge of the number system to include irrational numbers and rational approximations; (2) expressions and equations work with radicals and integer exponents along with proportional relationships, linear equations and systems of equations; (3) evaluation, comparison, and modeling of functions, and (4) geometry, including congruency, similarity, cylinders, cones, spheres, and the Pythagorean Theorem.

ADVANCED CHOIR

Students continue their development of choral singing. 8th Grade Choir requires a commitment to more performances than Beginning or Intermediate choirs. The vocal technique and performance skills taught will lead students toward self confidence and growth as ensemble singers. Students perform more advanced and challenging literature and continue to develop music reading skills. This is a performance-based course which requires day and evening performances as an extension of the classroom activities.

Prerequisites

Full Year Prerequisite: Successful completion of Intermediate Choir or equivalent, as determined by the director. Auditions may be necessary.

ADVANCED CONCERT BAND

Advanced Band is a performance-based course which requires student participation in day and evening performances. This class requires a commitment to more performances than Beginning and Intermediate Band. Through large and small ensemble work, students will be provided the opportunity to learn self-discipline, accountability, group cohesiveness, and commitment. New information the students will acquire include compound meters, advanced articulation patterns, and form. Students will experience further development in tone, rhythm, balance, blend, and music history. Through the study of different time periods and styles, students will understand music as a form of communication which will expand their ability to listen, analyze, and discuss concepts.

Prerequisites

Full Year Prerequisite: This course is designed for students who have successfully completed Intermediate Band or the equivalent. Placement will be determined by the instructor. Auditions may be necessary.

ADVANCED ORCHESTRA

8th Grade Orchestra is a performance-based course which requires student participation in day and evening performances. This class requires a commitment to more performances than Beginning and Intermediate Orchestras. Through appropriate literature, students will increase their ability to apply the fundamentals of music. Students will learn vibrato, advanced rhythms, and bowings. Students will understand music as a form of communication which will expand their ability to listen, analyze, discuss, and appreciate this art form.

Prerequisites

Full Year Prerequisite: This course is designed for string students who have successfully completed Intermediate Orchestra or the equivalent. Placement will be determined by the instructor. Auditions maybe necessary.

BEGINNING BAND

Beginning Band is a performance-based course which requires student participation in day and evening performances. Through large and small ensemble experiences, students will learn basic theory and performance skills such as articulation, embouchure, hand position and posture. Through their participation in an ensemble, the students will be introduced to blend, balance, intonation (playing in tune) and instrumentation. Students will learn self-discipline through home practice and rehearsal sessions.

BEGINNING CHOIR

Love to sing? Want to learn? Join us! This class provides an introduction to choral music. Students will learn to sing a variety of choral literature and styles from around the world in unison, and in two- or three-part harmony. Musical concepts are taught in daily rehearsals with an emphasis on correct breathing and vocal techniques.

This is a performance-based course which requires day and evening performances as an extension of the classroom activities.

BEGINNING JAZZ BAND

Jazz Band is a performance-based course which requires student participation in day and evening performances. Students play and perform to the basic instrumental ensemble styles of jazz, blues, rock, and stage band. Emphasis is placed on each student's individual playing and musical skills. Students develop their skills in the art of improvisation.

Credits 1-1

Prerequisites

Student must have successfully completed a minimum of one year in Band and must be currently enrolled in Band.

INTERMEDIATE BAND

Intermediate Band is a performance-based course which requires student participation in day and evening performances. Band students will be provided the opportunity to learn accountability and commitment to a team. During their ensemble experience, students will be exposed to intermediate-level music theory, articulation patterns, rhythmic patterns, and a variety of musical styles. Students will continue their quest to improve tone, breath support, blend, balance, and intonation. Listening and critical-thinking skills will be enhanced as students analyze their individual and group performances.

Prerequisites

Full Year Prerequisite: This course is designed for students who have successfully completed Beginning Band or the equivalent. Placement will be determined by the instructor. Auditions may be necessary.

INTERMEDIATE ORCHESTRA

Beginning Orchestra is a performance-based course which requires student participation in day and evening performances. In addition to further instruction in the basic skills, more complex keys and rhythms will be introduced as students read more difficult music (two- or three-part harmony). By the end of the year, students should be independent players, meaning they can read and perform age-appropriate music without prompting from a teacher or a peer. Listening and critical-thinking skills will be enhanced as students analyze their individual and group performances.

Prerequisites

Full Year Prerequisite: This course is designed for string students who have successfully completed Beginning Orchestra or the equivalent. Placement will be determined by the instructor. Auditions may be necessary.

World Music Drumming

World Music Drumming is a course that is designed for music students with no prior background in music. It explores the aural traditions of music that come from cultures that are unlike American culture (primarily the music of West Coast Africa and the Islands of the Caribbean). The course involves participation in drumming and singing activities! This is a hands on class that has students "doing" the majority of classes. Great for students who like to move and be active during class.

Science in Context-40790A/B

This course is a study of the effects of science on historical events and the development of the universe. Students will go through the entirety of the galactic timeline, from the Big Bang to the development of life, and societies, and the steps humans are taking to develop the future. Students will get a chance to look at how science and historical developments are intertwined - and that new complex changes and events are built on the ones that came before. Approved as an elective course only. Does not replace 6th/7th/8th grade required science courses.

SOCIAL STUDIES: ANCIENT WORLD - 6TH GRADE

In sixth grade, students deepen their understanding of the Earth and its peoples through the study of history, geography, politics, culture, and economic systems. Students begin their examination of the world by exploring the location and spatial organization of the world's major regions. This exploration is then followed by looking at world history from its beginnings. Students are given an opportunity to study a few ancient civilizations deeply. In this way, students develop higher levels of critical thinking by considering why civilizations developed where and when they did and why they declined. Students analyze the interactions among the various cultures, emphasizing their enduring contributions and the link between the contemporary and ancient worlds.

SOCIAL STUDIES: U.S. HISTORY -DISCOVERING OUR PAST - 8TH GRADE

In eighth grade, students develop a new, more abstract level of understanding of social studies concepts during their study of U.S. history and government, 1776 to 1900. Students explore the ideas, issues, and events from the framing of the Constitution up through Reconstruction and industrialization. After reviewing the founding of the United States, particularly the Constitution, students explore the development of politics, society, culture, and economy in the United States to deepen conceptual understandings in civics, geography, and economics. In particular, studying the causes and consequences of the Civil War helps them to comprehend more profoundly the rights and responsibilities of citizens in a culturally diverse democracy.

SOCIAL STUDIES: WASHINGTON STATE HISTORY - 7TH GRADE

In seventh grade, the second part of the year asks students to bring their understanding to their world today as they examine Washington State from 1854 to the present. The study of Washington State includes an examination of the state constitution and key treaties. While these two contexts may be very different, the purpose of studying these different regions and eras is the same: to develop enduring understandings of the core concepts and ideas in civics, economics, geography, and history.

Graduation Requirements

Courses and Credits

Each candidate for high school graduation in the Clover Park School District must have completed the equivalent of a four-year program of educational growth in grades 9-12. Thirty (30) credits are required for graduation. Credits shall meet the requirements of the state and district.

Distribution of Credits	
<i>The following credits are required in the specified subject areas of study for all candidates earning a diploma from the Clover Park School District.</i>	
English	4.0
Social Studies	
<ul style="list-style-type: none"> • WA State History and Government.....1.0 • World History.....1.0 • United States History and Government.....1.0 • Contemporary World Problems.....0.5 • Civics.....0.5 • Social Studies Electives.....0.5 	3.5
Mathematics	
<ul style="list-style-type: none"> • Algebra.....1.0 • Geometry 1-2.....1.0 • Math Elective (Algebra II or higher).....1.0 	3.0
Science	
<ul style="list-style-type: none"> • Laboratory Science.....2.0 • Science Elective.....1.0 	3.0
Fine Arts	2.0**
Career and Technical Education (CTE)	2.0
Health	0.5
Fitness	1.5
World Language	2.0**
Electives	8.5
Total Credits Required for a Diploma	30.0

* Per a change in state law (2012) Washington State History and Government will remain a mandatory Social Studies graduation requirement, but students will not be granted credit for its completion. It will be noted on the transcript as a met requirement.

** Per State Board of Education a Personalized Pathway Requirement (PPR) may replace taking 1.0 Art credit and 2.0 credit of World Language

High School and Beyond Plan

The State of Washington requires that, prior to graduation, every student complete a plan of action for the year after high school (Grade 13). This is a graduation requirement.

Below are opportunities to support the creation of a High School and Beyond plan. Selection of course work should be based on an appraisal of student ability, attitudes, interests, and needs.

Financial Aid/Scholarships

Financial aid is available from most colleges and vocational-technical institutes. By completing the proper forms, you become a candidate for all forms of aid for which you qualify at the college, university, or technical college of your choice. Your parents must file a Free Application for Federal Student Aid (FAFSA) with the College Scholarship Service in Princeton, NJ, to qualify for consideration. Most of the aid funds are limited to those students who demonstrate financial need in order to attend college. In all cases, the student and family will be expected to contribute what they can. See

your counselor for details about the financial aid process. The FAFSA must be filed as soon as possible after January 1 of the year the student plans to enroll in college.

You may apply for a Pell Grant by completing the FAFSA mentioned above. There are also some scholarships awarded by local organizations and regional or national competitions. When notices of these scholarships are received, they will be announced in the daily bulletin. Many of these are also granted on the basis of financial need.

The Washington Application for State Financial Aid (WASFA) is for people who don't file a federal FAFSA application. People who complete a WASFA are applying for state aid. There are various reasons to complete a WASFA instead of a FAFSA:

- A person may not be eligible for federal aid due to:
 - Citizenship or immigration status, including being undocumented.
 - Defaulted federal student loans.
 - Repayments owed on federal grants.
- A person may choose not to apply for federal aid due to:

- Family members who do not want to file the FAFSA.
- Other personal reasons.

After you complete the WASFA, the college(s) or program(s) you choose will determine whether you meet state residency requirements and state financial aid eligibility. State financial aid could include Washington College Grant, the College Bound Scholarship, Passport to Careers, National Guard Grant, or State Work Study. Please visit <https://wsac.wa.gov/> for more information.

Job Shadow

During their junior year, students are required to complete a six-hour job shadow in the career field that aligns with their HSBP. Students and parents should work with the high school counselor for more information about this graduation requirement.

Service Learning

Students must earn five (5) hours of Community Service per school year in attendance at CPSD as one of their graduation requirements. Students may begin to earn these hours once they complete their eighth (8th) grade year. The five hours may be earned all at one time, or in any manner that meets the student's schedule, during each of his/her high school years, but must be completed prior to the student's participation in a commencement ceremony and the granting of a diploma.

Community Service is any service that is done for non-profit agencies and organizations and/or religious organizations. School service is also included. To assure that the service is appropriate for this requirement, refer to the guidelines on the Verification of Community Service Form. If students have a problem with locating an agency or finding a way to meet this requirement, they should work with their counselor.

Standardized High School Transcripts & Diploma Awards

High school students need to know that future employers may request to see transcripts and that the decision to release them can be an important part of the process of applying for employment.

General Information

CPSD Equivalency Credits

Most graduation course requirements are met by successfully completing specified courses; however, some requirements may be met by successfully completing equivalency courses.

Important points to remember:

- An equivalency course must be completed in its entirety in order for "equivalency credit" to be granted.
- An equivalency waiver may satisfy two graduation requirements: one in the curriculum area in which a course is offered and one in the curriculum area in which the course appears on the approved list.
- No course shall be worth more than the credit it has been assigned. For instance, a semester course which is .5 credits may not be worth more than .5 credits.
- Equivalencies may not satisfy college admission requirements. Please check with the individual colleges for clarification.

Approved Equivalency Credit

The following list indicates the approved courses that may be used to meet graduation requirements:

Fine Arts	Primary Subject Area Credits	Secondary Credits
Visual Communications	1.0 CTE	1.0 Fine Arts
Prepress/Desktop Publishing	1.0 CTE	1.0 Fine Arts

Air Force JROTC. Cultural Studies	1.0 CTE	5 Social Studies Elective

Class Enrollment

1. Students have up until the tenth day of class to drop a class from their schedule.
2. Students who are enrolled in year-long classes cannot drop that class at second semester, unless principal approves.
3. If principal approves and student is withdrawn from the course, the student will receive a “W” (withdrawn) on their transcript. If a student is earning an “F” (failure) at the time of withdrawal, an “F” will be noted on their transcript.
4. Students enrolled in the Open Doors Youth Reengagement Program may not withdraw to enroll in a CPSD comprehensive high school program except within the first 10 days of the beginning of the course.
5. Eligible students may be considered for enrollment into the Open Door Youth Reengagement Program at any time.

Classes for Potential College Credit

Students may wish to register for a course that may provide an opportunity for college credit, like Advanced Placement or College in the High School or IB. As in all registrations, space availability and the student’s own course schedule may have an impact on that request. If a student has any questions about this process, she or he should contact an administrator. These requests must be finalized prior to the beginning of the semester. Many courses are also available for college credit via the Tech Prep program. Please see page 8 for more information on Tech Prep.

Clover Park School District Course Equivalents Running Start

***Please note: Common Course Numbers (CCN) are designated with the “&” symbol.**

High School Requirement	Pierce College Equivalent
Junior English	ENGL & 101
Senior English	ENGL & 101 (for students not in RS as a junior) or ENGL & 107, ENGL & 111, ENGL & 112, ENGL & 113, ENGL & 114, ENGL & 220, ENGL & 227, ENGL & 228, ENGL & 236, ENGL & 237, ENGL & 239 (choose one)
Pacific Northwest History	HIST & 214 (for 2017 and 2018 graduates who did not take US History at a CPSD high school)
U.S. History 1	HIST & 157
U.S. History 2	HIST & 158 or 159
Contemporary World Problems	Choose one: POLS & 101, POLS & 203, 230 or SOC & 201

High School Requirement	Pierce College Equivalent
Civics	Choose one: POLS & 202 or POLS & 208 (beginning with 2016)
Social Studies Elective	Any 5 credit Social Science course 100 or higher

World Language	Any 5 credit World Language course 100 or higher

Clover Park School District High School Programs

Clover Park High School

Clover Park High School is a comprehensive, grades 9 through 12 high school with a small school feel.

Ninth grade students are in a grade level specific smaller learning community (SLC). The ninth grade

SLC program includes foundational courses in the humanities as well as an introductory science, technology, and math sequence as a preparation for grades 10-12. The ninth grade smaller learning community provides the necessary background to enable students to make an appropriate choice into pathway/major focus for grades 10-12. Another key attribute of that foundational core is the development of academic skills and traits that establish high expectations and standards, habits of success, and social skills necessary for citizenship, career, and college-readiness.

Tenth grade students continue a schedule that emphasizes the core curriculum: Pre-AP English, a Western Studies component, Geometry, and Biology. Similarly to ninth grade students, second year high school students have options when contemplating their elective classes. Tenth grade students should be deliberate about pursuing a schedule that prepares them academically for post-secondary experiences. All tenth grade students are rigorously preparing for high school exit exams, or Smarter Balance Assessments that will be taken in the 11th grade. Additionally, 10th grade students begin working on their Pathway or Major designation in Career and Technical Education coursework.

Eleventh grade students continue an emphasis of the core curriculum requirements: an American Studies component that includes AP English or English 11; US History, or AP US History; Algebra II or higher; and Chemistry or another lab science. Eleventh grade students will also be working toward their CTE program completion certificate in an area of study that aligns their core curriculum work with a career interest. Students should be deliberate about selecting a schedule that challenges them and prepares them for admission to Washington colleges and universities. Successful completion of continuing and advanced science, math, and writing courses are extremely important predictors of future student success.

Twelfth grade students will complete their program of study and all of the coursework needed to demonstrate mastery of the core curriculum: a Contemporary Studies component that includes English 12 or AP Literature; Contemporary Affairs or AP US Government; and are encouraged to take a fourth year of math and/or science. Twelfth grade students should be working on a schedule that challenges them academically and completes required courses for admission to Washington colleges and universities.

Throughout high school students will be working to establish and maintain a High School and Beyond Plan. This is also a graduation requirement upon completion of the 12th grade year. The HSBP is a compilation of thoughtful exercises designed to help students design a post-secondary plan that is customized for them and leads to a high level of preparation for success after high school. This plan is built and maintained in each advisory. The advisory teacher will continue with his/

her advisory students throughout grades 9 through 12 in order to build relationships and maintain a consistent focus on the plan.

Lakes High School

Lakes High School is structured into three academies: 9th Grade Success Academy, 10th Grade Success Academy, and 11th/12th Grade Pathways Academy. All Lakes High School students will participate in Lancer Link. This is an advisory group that students will attend to help them prepare for graduation. Students will stay with the same group and advisor for the entire four years at Lakes. Each student will keep a portfolio of their high school work and have an opportunity to share it with their parents each year through student portfolio conferencing in the fall and spring. In their senior year, students will create a presentation for their state required High School and Beyond Plan.

Ninth Grade Success Academy supports students to build a strong academic base. Test data and previous academic accomplishments are used to provide students and parents scheduling support ensuring students are placed in classes that will meet their academic needs. The academy ensures foundational core courses in English, Math, Science, Social Studies, Health, Fitness, and electives that prepare students for their academic pathway through grades 10-12 and beyond. Students will develop the foundational core to establish the skills for high expectations and standards, habits of success, and social skills necessary for citizenship, career, and college-readiness. A highlight for this academy is that all 9th grade students are provided mentors to support their transition from middle school to the high school.

Tenth Grade Success Academy continues the work of the Ninth Grade Success Academy to support students in building a solid academic foundation. The academy ensures foundational core courses in English, Math, Science, Social Studies, and CTE. College bound students will have additional opportunities to challenge their academic prowess with the AP course offerings of AP English Composition, AP World History, AP European History, AP Environmental History, and AP Calculus A/B. This academy develops the students' ongoing understanding of the available pathways to prepare them for the remainder of their high school career.

11th/12th Grade Pathway Academy guides students to take courses that position them to be competitive for admission to the college and/or career of their choice. The Pathway Academy consists of:

- Science, Technology, Engineering, and Mathematics (STEM)
- Health and Human Services
- Arts and Communication
- Business and Marketing

Students will select a pathway that interests them, and through specific pathway courses and authentic

experiences (i.e., job shadowing and Career Connections). College bound students will have opportunities to continue to challenge their academic prowess with the AP course offerings of AP English Literature, AP US History, AP American Government, AP Chemistry, AP Biology, AP Spanish, AP Studio Art, AP Music Theory, AP Statistics, and AP Calculus B/C. Students will also choose courses that enhance career readiness through their completion of program certifications (i.e., MOS, CPR, NAC), being program completers (students completing 360 hours in a CTE program). Graduates are proud to say, "Once a Lancer, Always a Lancer."

Harrison Preparatory School

Lt. General William H. Harrison Preparatory School is an International Baccalaureate World School designed to provide a seamless secondary school experience for students in grades six through twelve.

Harrison Preparatory is a school of choice for all middle and high school students in Clover Park School District (CPSD). The continuity of program spans both middle and high school and gives students the opportunity to build relationships without transitional adjustments. Because of this continuity, preparation for challenging and rewarding high school courses can start at sixth grade.

International Baccalaureate (IB)

The International Baccalaureate (IB) is Harrison Preparatory School's signature program. As of February 2015, Harrison is an authorized IB Diploma Programme School and will begin offering DP courses starting in the 2015-16 academic year. The IB Diploma Programme is for students aged 16-19 (grades 11 and 12), and the MYP will serve as preparation for the internationally renowned DP program.

IB Middle Years Programme (MYP)

Harrison currently offers the MYP designed for students in grades 6 through 10. The MYP aims to develop active learners and internationally-minded young people who can empathize with others and pursue lives of purpose and meaning. Implementation of the program empowers students to inquire into wide ranges of significant local, national and global issues. The goal is to cultivate young people who are creative, critical and reflective thinkers. Concurrently, students receive access to the best of Clover Park School District's curriculum and the Common Core State Standards as well as state standardized testing.

As part of the MYP requirements, students will participate in eight subject areas including: English, Spanish, History, Math, Science, Arts, and Technology. Additionally, in the fifth year of the program (10th grade), students will demonstrate their culminating knowledge in a research-based Personal Project. They choose a topic of interest, complete research and an action plan to show how they grew as a result.

What is the Diploma Programme?

The DP curriculum is made up of six subject groups and the DP Core. Each class is a 2-year continuous course at the end of which students take an exam. These courses teach students to think deeply about the subject matter and to see connections between all disciplines.

In addition to the six subject groups, students who commit to pursuing the full IB diploma will have access to the Core, comprised of a class called Theory of Knowledge (TOK) as well as participating in Creativity, Action, Service (CAS) and the Extended Essay (EE).

Through the DP Core, students reflect on the nature of knowledge, complete independent research and develop projects that reflect their understanding of Creativity, Action, and Service.

Who can take DP courses?

The DP is open to any student aged 16 to 19 at schools, like Harrison Preparatory that have been authorized to implement the program, provided that they've taken and been successful in all prerequisite courses.

Students will have two options within the Diploma Programme: 1) to become a Diploma Candidate and possibly earn an IB diploma in addition to the CPSD high school diploma, or 2) to become a Certificate Candidate. These options allow for some flexibility depending on the level of challenge that a student wants to undertake.

College Credit/College Credit Options for High School Students

Clover Park School District strives to provide all students with an exemplary college preparatory education so they can succeed in college, career and life.

Advanced Placement (AP) Program

All students are encouraged to seriously consider enrollment in one or more AP courses during 10th, 11th and 12th grades. AP courses are also available to students in 9th grade. Advanced Placement courses are college-level courses offered in high school. AP courses include extensive reading. Students in AP courses may earn college credit if they perform well on rigorous national AP tests. Ask your counselor for assistance in selecting courses that will prepare you for success in any AP course that interests you. Additional information about the AP program is found on page 4 in the AP information section.

Community/Technical College CTE Dual Credit

DUAL CREDIT (<http://pc3connect.org>) is a combined secondary and post-secondary program of integrated courses allowing high school students to begin a

Career and Technology Education program that leads to a two-year Associate degree or a two-year certificate and/or a four-year baccalaureate degree. To begin a Tech Prep sequence, students should enroll in a high school Career and Technical Education class that is designated as a college credit course. If the student completes the course with the minimum required grade and completes a SERS application, they will receive the equivalent course credit at no cost at the participating community or technical college. Your career specialist has information on these programs. Dual Credit is available with Clover Park Technical College (CPTC), Bates Technical College (BTC) and Pierce College (PC).

College in the High School

This program provides high school students the opportunity to earn college credit in approved high school courses, when the equivalent course is taught at a college or university. Clover Park students may choose to take any College in the High School course for high school credit only, choosing not to pay the college or university the optional fee for college credit. Contact your high school teacher of the particular courses for more information.

International Baccalaureate (IB)

The International Baccalaureate (IB) Program, located at Harrison Preparatory School, is recognized internationally as a rigorous and comprehensive curriculum, designed to challenge college-bound students. The IB program's broad range of subjects accommodates diverse student interests and intentions while adhering to the objectives of a cohesive liberal arts education. IB courses are college-level courses offered in high school which includes frequent homework and involves extensive reading. Students in IB courses may earn college credit or advanced placement if they perform well on rigorous IB tests. For more information see specific course descriptions, or talk to a Harrison Prep counselor.

Running Start

Current Washington State legislation allows high school students to attend their local community college or technical school and earn high school credits and college credits at the same time. There are no tuition fees for the student if the number of credits does not exceed the maximum allowed. Students enrolled in Running Start must:

- Have junior or senior standing in high school.
- Make application to the program during the enrollment period in March prior to the fall quarter the student wishes to attend.
- Sign a Clover Park School District Running Start contract with parent(s)/guardian(s).
- Enroll in courses that are approved by the high school counselor so that graduation requirements are completed in conjunction with any college

coursework that may lead to an Associates degree. The student should also maintain fulltime enrollment so that the student's graduation status is not jeopardized.

- Be responsible for knowing the registrations date(s) and deadline(s) for district and college course registration
- Be responsible for transportation, lab fees and books.

Students taking a quarter class through the Running Start Program (#100 and above) will be issued high school credit that reflects quarter hour participation. Generally, a five hour quarter Running Start class will equal

1.0 high school credits. Running Start courses (#100 and above) equate to .5 required and .5 elective credit. Running Start courses numbered below 100 will equal .5 high school credits. For a complete listing of these equivalent credits, please see your high school counselor. It is important to note that very specific Running Start courses are equivalent to the Clover Park School District program. Please contact your high school counselor for a listing of courses that meet CPSD requirements. The approved Running Start courses are listed in the course descriptions on the following pages.

Pierce College and Tacoma Community College Equivalent Courses

See appendix in back of course catalog.

College Entrance Tests

(Announcements for registration and test dates will appear in the school bulletin)

PSAT	(Grade 10, 11)
SAT/SAT II	(Grade 11 or 12)
ACT	(Grade 12)

Advanced Placement Testing

Students enrolled in an Advanced Placement (AP) course in high school are encouraged to test their knowledge. Students may earn college credit with high scores on these tests. The Clover Park School District will assist students in reducing the cost of each test.

Information on this assistance is available in the school guidance office.

Counseling Program

All school counseling programs will include the following elements: guidance curriculum, individual student planning, responsive services, and systems support for the counseling program.

The focus of the counseling department is to help students with academic and career planning and to

foster personal exploration, self-awareness, and social growth. Students are encouraged to set realistic yet challenging goals, to make responsible decisions, to understand the consequences of their actions, and to learn to self-advocate.

Students should contact a counselor if they have questions about transitions between schools, registration, course selection, interpretation and use of test results, or graduation requirements. High school counselors assist students with academic, career, college, and personal questions. Visit or call the counseling center or career center to make an appointment with your counselor.

Counselors offer a wide variety of services, resources and activities:

- Visit middle schools during the prior school year to provide a smooth transition from middle school to high school.
- Assist students in planning, selecting and successfully completing middle and high school courses and completing the High School and Beyond Plan required for high school graduation.
- Teach students (in classrooms) about the intricacies of college admission, how to develop and sustain study habits and develop personal/social support systems.
- Provide students and families with information about course selection/registration, college admissions testing, financial aid, socio-emotional issues, mental health resources.
- Facilitate outreach with community mental health support agencies.
- Monitor students' academic progress and assist student in developing plans to support students so that they are successful in resolving problems in doing well in school and classes.
- Provide a program to prepare students for an education beyond high school.
- Develop and lead groups with topics ranging from body image, self-esteem to academic improvement.
- Assist students with issues, academic or personal, that are or may be interfering with academic performance.

Career specialists help students:

- Develop an awareness of self (interests, aptitudes).
- Explore a variety of careers (speakers, field trips, and internships).
- Examine the educational requirements for their chosen careers.
- Develop job-seeking skills.

Full Schedule Requirement

- All 9th and 10th graders must take eight credit-producing classes. As a general rule, these students may not take any non-credit class such as Office, Library or Teacher Assistant.

- All 11th and 12th graders must take a minimum of seven credit-producing classes. If they register for eight credits in the spring, they will be required to take eight credits throughout the following school year. Spring registration is binding in this regard and requires serious advance thought.
- For 11th or 12th graders, an open period must be first or fifth, or fourth or eighth period. There are no open periods during the middle of the school day. Students are expected to be off school grounds or in a supervised non-credit class during an open period. An 11th or 12th grader who is on campus for all eight periods may serve as a Teacher Assistant or another non-credit option, such as an Office or Library Assistant, as long as they have met standard on all state assessments

High School Course Requirements for College Entrance

All colleges strongly recommend a varied, in-depth, academic course of study.

Students should take as many “core” courses as possible: English, mathematics, science, social studies and world language. All student schedules should contain creative arts and skill courses to complement core studies.

Applications for admission to Washington 2-year and 4-year institutions are available on-line or from your counselor. Admission forms for out-of-state colleges must be obtained on-line or by writing to the admissions office of that institution. Complete the application forms and make arrangements with the counselor to send a transcript. Transcripts should be requested from the School Registrar.

The state supported four-year colleges generally require a 2.5 or higher grade average for your 9th, 10th and 11th grades. Private colleges often have no specific grade average requirements, but the higher your grades— so long as these grades are in academic courses — the greater your chances of being accepted and succeeding when enrolled. Community colleges in Washington require that you have a high school diploma and have passed a replacement test.

The following sample is considered a strong college preparatory schedule in the State of Washington:

Recommended Courses	
English	4 years
College Preparatory Math (through 2nd year Algebra or higher)	4 years
Science (2 years laboratory)	3 years
World Language	3 years
Social Studies	3.5 years
Arts	1 year

Recommended Courses	
Additional Electives from the above areas	1-1/2 full years

High School Four-Year Educational Plan

On the following page is an important worksheet to help you plan the courses you will take in high school. Please be aware that your post-high school plans for college, employment, or career training may require courses beyond the graduation requirements. Also, if you want to finish up your high school program with some Advanced Placement or advanced-level vocational courses, you need to register for the necessary classes during 9th, 10th, and 11th grade.

It's your future, so plan carefully!

You are strongly encouraged to complete your graduation requirements in the years indicated on the planning worksheet. Use the descriptions in this course guide to help you decide which courses to take in each subject area.

Career- & College-Ready Graduation Requirements for the Class of 2019 & Beyond	
Subjects	Credits
English	4
Math	3
Science	3 (2 labs)
Social Studies	3.5
Career and Technical Education ¹	2
Health and Fitness	2 (.5 Health)
Arts	2 (1 can be PPR)
General Electives	8.5
World Language (or) Personalized Pathway Requirement (PPR)	2 (both can be PPR)
Total Credits	30

Personalized Pathway Requirements are related courses that lead to a specific post high school career or educational outcome chosen by the student based on the student's interests and High School and Beyond Plan, that may include Career and Technical Education, and are intended to provide a focus for the student's learning.

¹ Or 1 Occupational Education credit, as defined in WAC 180-51-067.

² Up to 2 credits can be waived locally based on a student's unusual circumstances.

High School Grade Level Description

According to Board Policy 2421, the level/class descriptions for all high school students will be:

High School - yr. 1	Freshman (9)
---------------------	--------------

High School - yr. 2	Sophomore (10)
High School - yr. 3	Junior (11)
High School - yr. 4	Senior (12)
High School - 5 & Beyond	Senior (12+)

Honors at Graduation

Students who have achieved a cumulative grade average of 3.50 or higher for grades 9, 10, 11, and 12 will be recognized as honor graduates. This determination will be made at the end of the first semester of grade 12 and Running Start students after first quarter of senior year.

Prepare Now For Your Future The Advanced Placement and International Baccalaureate Programs

The choices you make now will determine the future course of your life. By taking college-level Advanced Placement (AP) or International Baccalaureate (IB) classes you enter a world of knowledge and a learning environment that you might not otherwise experience in high school; by taking AP or IB exams, you have the opportunity to earn credit or advanced standing at many of the nation's colleges and universities.

Advanced Placement courses are offered in all our high schools. While the availability of classes differ among the schools, in Clover Park School District we offer a variety of AP courses ranging from English, US History, to Statistics, Calculus, Biology and Chemistry, to Spanish Language, Music Theory and Art Portfolio. Additional courses can be found later in catalog. We try to provide a broad selection of courses to appeal to a wide variety of student interests.

The International Baccalaureate Diploma Program (IB) is located at Harrison Preparatory School. The 2-year IB Diploma Program is designed to meet international standards of excellence and is typically completed by students in grades 11 and 12. IB features a comprehensive and broadly based curriculum that includes languages, social studies, science, mathematics, and electives culminating with examinations in six subject areas.

WHY SHOULD YOU SIGN UP FOR AP OR IB COURSES?

The greatest benefit of AP/IB is the experience of taking academic courses in an enriched environment with classmates who, like you, are seeking intellectual challenge, are motivated to learn, and are committed to excellence. Participating in these courses is going to give you a head start on exactly the sort of work you will confront in college. You will improve your writing skills and sharpen your problem-solving techniques;

develop the study habits necessary for tackling rigorous coursework; assume the responsibility of reasoning, analyzing, and understanding for yourself; and study subjects in greater depth and detail.

WHAT ARE THE REQUIREMENTS?

AP/IB courses are challenging courses; however, we offer just the classes you need in order to be well prepared. In this Course Catalog you will find a flowchart for many of the content areas that describes a recommended course sequence leading up to AP and IB courses. Other than that, the only requirements for becoming an AP/IB student are a curiosity about the subject you plan to study and the willingness to work hard.

WANT TO LEARN MORE ABOUT ADVANCED PLACEMENT OR THE INTERNATIONAL BACCALAUREATE PROGRAM?

For more information about either of these programs you can check with your school counselor. Additional information may also be found online at:

Advanced Placement: <http://www.collegeboard.com/student/testing/ap/about.html>

International Baccalaureate: <http://www.ibo.org/>

Scheduling

We hope this guide will answer all of your questions as you decide what high school courses to register for next year. The courses in this guide will be offered next year only if enough students at each school register this spring to fill a class. So, it is very important that you think carefully about your choices now, including alternative selections, so that the courses you want will be available next year at your school. Another reason for students and parents to take spring registration very seriously is that students will be committed to their schedule. Changing student schedules will be done only under exceptional circumstances. Desire

to have a common lunch with a friend, to be in the same class with a friend, to have a different teacher, preference for a different elective, or similar personal preferences will not be accepted as reasons for schedule changes. The choices you make now will determine your schedule. If you cannot find the answers you need, or if you would like to have individual help in planning your program, please contact an administrator or counselor at your school.

Clover Park High School(253) 583-5500

Lakes High School.....(253) 583-5550

Harrison Preparatory School.....(253) 583-5418

School Program

The school year at the high school is divided into two 18-week semesters. One credit is earned for a full year. One-half credit is earned for one semester.

The first honor roll is an alphabetically arranged list of all students achieving a grade point average of 3.67 or above. The second honor roll is a list of students achieving a grade point average of at least 3.17 to 3.66.

Academic courses are defined as those in the department of English, world language, mathematics, science, social studies, and other courses.

The State Board of Education determines the numerical value of letter grades:

A = 4.0	A = 4.0	C = 2.0	D+ = 1.3
A- = 3.7	B- = 2.7	C- = 1.7	D = 1.0
B+ = 3.3	C+ = 2.3	F = 0.0	

A pass/fail option may be used in place of the A-F grading scale in a course not classified as an academic course and not required for graduation. A Pass/Fail grade will not be figured in the grade point if a "P" grade is earned. An "F" grade will, however, be included in determining the grade point average.

Parents or adult students must request the pass/fail option within ten (10) days of the beginning of a course. The principal may authorize pass/fail after consultation with parents, students, and counselor after ten days.

Service Learning

Students must earn five (5) hours of Community Service per school year in attendance at CPSD as one of their graduation requirements. Students may begin to earn these hours once they complete their eighth (8th) grade year. The five hours may be earned all at one time, or in any manner that meets the student's schedule, during each of his/her high school years, but must be completed prior to the student's participation in a commencement ceremony and the granting of a diploma.

Community Service is any service that is done for non-profit agencies and organizations and/or religious organizations. School service is also included. To assure that the service is appropriate for this requirement, refer to the guidelines on the Verification of Community Service Form. If students have a problem with locating an agency or finding a way to meet this requirement, they should work with their counselor.

State Required Testing

Twelfth grade students (Class of 2016) and those classes thereafter in the state of Washington, are required to meet standard on the state required assessments. The purpose of these assessments is to measure student achievement against the grade level expectations that are statewide standards and is an assessment of a student's ability to understand and apply knowledge in Reading, Writing, Mathematics and Science. Students should check with their counselor about what is required for their specific graduation year as it varies.

See Policy CPSD 2410 and <https://www.k12.wa.us/student-success/testing/state-testing>

AP ENVIRONMENTAL SCIENCE A - 404421

AP Environmental Science is a rigorous course designed to be the equivalent of a one-semester college course focusing on critical thinking and scientific analysis of current issues. Environmental Science integrates ethics, philosophy, law, and economics with ecology, chemistry, and geology. This course prepares students to take the AP Environmental Science examination, and, with a successful outcome, to obtain credit or placement at colleges. Participation in Earth Club/FFA complements course topics. Credit for Graduation CTE or Lab Science.

NATURAL RESOURCE/BIOLOGY B - 408102

Natural Resource Biology explores the topics of cells, heredity, evolution and ecology. Students explore the interaction and impact of humans on the environment. The course includes laboratory experiences, field investigations and scientific research projects. Participation in the Earth Club/FFA is a complement to Natural Resources Biology and can help students to gain leadership experience. Credit for Graduation: Lab Science / CTE

AUDIO VIDEO TECHNOLOGY II A -927109

Inquiry and problem-solving are at the heart of the subject. DP design technology requires the use of the design cycle as a tool, which provides the methodology used to structure the inquiry and analysis of problems, the development of feasible solutions, and the testing and evaluation of the solution. A solution can be defined as a model, prototype, product or system that students have developed independently. DP design technology achieves a high level of design literacy by enabling students to develop critical-thinking and design skills, which they can apply in a practical context. While designing may take various forms, it will involve the selective application of knowledge within an ethical framework Credit for Graduation: CTE or Art

CORE PLUS CONSTRUCTION TECHNOLOGY A - 928210

The successful Core Plus Construction Technology student will be prepared for a variety of career opportunities throughout the concrete and construction industries. Through hands-on, career focused lessons and skill development, this course introduces students to the basics of concrete work and its importance and application as a construction material. Students will gain knowledge and skills that may be included in the examinations for Concrete Field-Testing Technician Certification program. This course was developed through a partnership with industry professionals and will provide students the opportunity to learn more about careers in construction as well as structural and civil engineering. Graduation Credit: CTE

IB DP Language and Literature 2- 010113/14

This is the second level course for IB DP Language and Literature. In this course, students study a wide range of literary and non-literary texts in a variety of media. By examining communicative acts across literary form and textual type alongside appropriate secondary readings, students will investigate the nature of language itself and the ways in which it shapes and is influenced by identity and culture. Approaches to study in the course are meant to be wide ranging and can include literary theory, sociolinguistics, media studies and critical discourse analysis among others.

IB LITERATURE HL I A - 010071

Through the study of a wide range of literature, the language A: literature course encourages students to appreciate the artistry of literature and to develop an ability to reflect critically on their reading. Works are studied in their literary and cultural contexts, through close study of individual texts and passages, and by considering a range of critical approaches. The study of works in translation is especially important in introducing students, through literature, to other cultural perspectives. The response to the study of literature is through oral and written communication, thus enabling students to develop and refine their command of language. Credit for Graduation: English

WRITING FOR COLLEGE 1 - 209011

Writing for College is designed to support and scaffold the rigorous critical thinking, reading and research-intensive writing associated with a college-level course. Through the exploration of a variety of texts students will develop and refine research and writing skills over the course of multiple writing assignments. Additionally, students will display their writing skills by analyzing poetry, reviewing short stories, exploring novels, developing effective arguments, and completing research of electronic databases, informational text and other text for academic appropriateness. Students will learn and use the MLA requirements for an accurately formatted annotated bibliography and research paper including in-text citation, and signaling phrases. WRITING FOR COLLEGE 2 - 209012

Writing for College is designed to support and scaffold the rigorous critical thinking, reading and research-intensive writing associated with a college-level course. Through the exploration of a variety of texts students will develop and refine research and writing skills over the course of multiple writing assignments. Additionally, students will display their writing skills by analyzing poetry, reviewing short stories, exploring novels, developing effective arguments, and completing research of electronic databases, informational text and other text for academic appropriateness. Students will learn and use the MLA requirements for an accurately formatted annotated bibliography and research paper including in-text citation, and signaling phrases. English Language Learner Program

ELL 10 - 251101

This course is required for new students who score at the beginning or low intermediate level on the ELL placement test (ELPA21). This class focuses on gaining both Basic Interpersonal Communication Skills (BICS) and Cognitive Academic Language Proficiency (CALPS) that students need to be successful in high school. Along with building basic literacy skills, students will focus on learning academic language and learning strategies necessary to succeed in core classes. Students will develop the skills needed to read and understand a variety of texts. Credit for Graduation: Elective

AUDIO VIDEO TECHNOLOGY II A -927109

Inquiry and problem-solving are at the heart of the subject. DP design technology requires the use of the design cycle as a tool, which provides the methodology used to structure the inquiry and analysis of problems, the development of feasible solutions, and the testing and evaluation of the solution. A solution can be defined as a model, prototype, product or system that students have developed independently. DP design technology achieves a high level of design literacy by enabling students to develop critical-thinking and design skills, which they can apply in a practical context. While designing may take various forms, it will involve the selective application of knowledge within an ethical framework Credit for Graduation: CTE or Art

HEALTH AND FITNESS - 506202

High school health integrates a variety of health concepts, skills, and behaviors to plan for personal and lifelong health goals. Students develop skills that will make them health-literate adults. These include awareness and consequences of risky behaviors, disease prevention, overall wellness, and identification of community health resources. Students are taught how to access accurate information that they can use to promote health for themselves and others. Their behaviors reflect a conceptual understanding of the issues associated with maintaining good personal health. Students demonstrate comprehensive health and wellness knowledge and skills. They use problem-solving, research, goal-setting and communication skills to protect their health and that of the community. Credit for Graduation: Health

ALGEBRA II A - 301103

Algebra II is the third year in a three-year sequence of high school mathematics. This course will cover linear functions, quadratic functions, polynomial functions, exponential and logarithmic functions, radical functions and rational functions. The real number system is extended to include complex numbers. All topics are studied from an algebraic, graphical, numerical and exploratory approach. An emphasis on applications and appropriate calculator use will be integrated throughout the year. Credit for Graduation: Mathematics

AP CALCULUS A/B A - 303601

All students may take courses with AP designation. This full year course is designed to prepare the student for advanced placement in college calculus. Included is the study of elementary functions, limits, and the derivative. The second semester continues with techniques of integration and applications of differentiation and integration. The course also prepares the student for the Advanced Placement examination administered by the College Entrance Examination Board. Credit for Graduation: 1.0 Mathematics and 1.0 Elective

BRIDGE TO COLLEGE - MATH A - 301201

This course includes building and interpreting functions (linear, quadratic & exponential), writing, solving and reason with equations and inequalities, and summarizing, representing, and interpreting data. The course is designed to focus on building conceptual understanding, reasoning and mathematical skills and provides students engaging mathematics that builds flexible thinking and a growth mindset. For seniors who score in Level 2 on Smarter Balanced 11th grade assessment and are successful in this course (B or better), the Bridge to College Mathematics course offers an opportunity to place into a college-level course when entering college directly after high school. IB Math Analysis and Approaches 1A-021321

The IB DP Mathematics: analysis and approaches course recognizes the need for analytical expertise in a world where innovation is increasingly dependent on a deep understanding of mathematics. The focus is on developing important mathematical concepts in a comprehensible, coherent and rigorous way, achieved careful balanced approach. Students are encouraged to apply their mathematical knowledge to solve abstract problems as well as those set in a variety of meaningful contexts. Mathematics: Analysis and approaches has a strong emphasis on the ability to construct, communicate and justify correct mathematical arguments. Students should expect to develop insight into mathematical form and structure and should be intellectually equipped to appreciate the links between concepts in different topic areas. Students are also encouraged to develop the skills needed to continue their mathematical growth in other learning environments. Math Analysis 1: This course will give students a strong background in the precalculus skills required to apply the techniques of calculus with and without technological assistance. The course will also provide students the needed skills to handle data sets and make conclusions about data in our data rich world.

IB Math Applications and Interpretations 1A-021311

The Math Applications and Interpretation course recognizes the increasing role of mathematics and technology play in a diverse range of fields in a data-rich world. As such, it emphasizes the meaning of mathematics in context by focusing on topics that are often used as applications or in mathematical modelling. To give this understanding a firm base, this course includes topics that are traditionally part of a pre-university mathematics course such as calculus and statistics. The course emphasizes the use of technology as well. Math Applications 1: As a course focuses on providing students with strong skills in function recognition and evaluation. Helping students understanding what functions are useful for modelling real world situations. Additionally the course focuses on data literacy in the first year to help student develop analysis skills when working with one and two variable data sets.

Modeling Our World with Mathematics- 305021/22

Modeling Our World with Mathematics (MOWWM) is a modularly designed mathematics course designed to follow Geometry. It contains career-connected thematic units where students use high school mathematics to analyze everyday life and work. The content and instructional strategies support increased attainment of the common core high school content standards while developing the standards for mathematical practice.

Credits 1-1**Prerequisites**

Passing grades in Algebra 1 and Geometry; should have attempted the HS Math SBA and scored below 2595; teacher recommendation

Must review the 3rd year math form signed by a parent prior to enrollment in the course to ensure parent and student are aware of their math requirements.

Notes

The AVID I course is an elective class for college-bound students. It provides academic, tutorial, career-goal planning, and social support for students through AVID curriculum (WIC-R) and AVID High School Libraries focus on Writing, Inquiry, Collaboration and Reading. To ensure success in college-prep courses, students work independently and as partners, as well as in teacher and tutor-led collaborative groups. Note-taking, outlining, writing, speaking, reading, test-taking strategies, maintaining organized notebook binders, self-awareness, and preparation for PSAT are stressed. Students receive information regarding AP classes and may participate in AP classes. Credit for Graduation: Elective

AVID III – SAT/ACT COLLEGE PREP A - 621005

Using AVID strategies, this course will focus on preparing students for success on college entrance exams such as the SAT/ACT, as well as the rigors of college level coursework. Students will review the SAT/ACT test formats, exam directions and scoring guides. They will also learn key test-taking strategies including critical reading/writing skills and math strategies. The course will offer ample opportunity to practice the required skills for the exams. Additionally, coursework will focus on college research by investigating the college admissions requirements, the application process, and information about scholarships and financial aid. AVID tutors will provide guidance through the peer study group model. Students in this class will practice the skills necessary to select, apply to and succeed at an appropriate four-year university. FUNCTIONAL ENGLISH ACADEMICS A - 202821

Instruction includes oral language development, as well as concepts about print, phonics, sight-reading and vocabulary. Students also learn reading skills from a selected reading program. They will learn to identify and use functional words in the community. Students will learn basic writing skills to extend their learning beyond the IEP. Students will be encouraged to use a variety of modes of communication including, but not limited to: sign, oral, written, picture-based communication, vocal output devices, computer programs, and other forms familiar to the students. Students may take this class one to four periods per day based on their IEP goals and objectives. Learning objectives for this course are individualized and align with student's IEP goals and objectives.

AP UNITED STATES HISTORY A - 454601

The AP U.S. History course focuses on the development of historical thinking skills (chronological reasoning, comparing and contextualizing, crafting historical arguments using historical evidence, and interpreting and synthesizing historical narrative) and an understanding of content learning objectives organized around seven themes, such as identity, peopling, and America in the world. In line with college and university U.S. history survey courses' increased focus on early and recent American history and decreased emphasis on other areas, the AP U.S. History course expands on the history of the Americas from 1491 to 1607 and from 1980 to the present. ETHNIC & CULTURAL STUDIES - 454301

This course is designed for students to be politically, socially and economically conscious about their personal connections to local and global histories. By studying the histories of race, ethnicity, nationality, sexuality, and culture, students will cultivate respect and empathy for individuals and solidarity with groups of people locally, nationally, and globally so as to foster active social engagement and community building.

Particular focus will be given to contributions and struggles of different racial and ethnic groups for liberty, equality, and justice in the United States. Students will investigate and analyze the historical factors of power and privilege and the subsequent impact on historically disadvantaged groups' ability to navigate and mitigate internal and external structures that influence their human experience. Credit for Graduation: Social Studies Elective.

This course polishes student oral and writing skills. This is accomplished through an overview of French history, geography, and economy; discussions of current French values; review and expansion of grammar; written compositions and literature. Time is devoted to everyday situations allowing students to gain self-confidence in expressing themselves comfortably. Fee required. Credit for Graduation: World Language

IB DP Spanish Language & Literature 2 010123/24

This is the second level course of IB DP Spanish Language & Literature. In this course, students study a wide range of literary and non-literary texts in a variety of media. By examining communicative acts across literary form and textual type alongside appropriate secondary readings, students will investigate the nature of language itself and the ways in which it shapes and is influenced by identity and culture. Approaches to study in the course are meant to be wide-ranging and can include literary theory, sociolinguistics, media studies and critical discourse analysis among others.

Harrison Preparatory School

Harrison Prep will prepare all students for successful completion of post-secondary education. Students will receive a rigorous and continuous education based on integrated units of study tied to real world experiences. Regular athletic and music programs are not currently offered in this small school setting.

Each student will have an individualized student learning plan designed to promote the student's mastery of core competencies. It will include how the student has demonstrated what he/she has learned.

General Information

Assessment and exams

At the end of each course, students take an exam. These exams assess student work as direct evidence of achievement against the stated goals of the Diploma Programme (DP) courses. The scores on these exams can be used to determine college credit for both Diploma Candidates and Certificate Candidates, depending on the post-secondary institution. The scores will also determine if a student has earned an IB diploma in addition to their high school diplomas.

Community and Service

Since 2006, beginning with Week Without Walls (WWW) and then continuing with Community and Service Days (CSD), Harrison Prep has focused attention on developing students who understand how to give back to their community. Students and teachers have been involved in developing partnerships with local non-profit organizations like Caring for Kids and the Lakewood Historical Society, as well as more widely known organizations like United Way, Relay for Life, Key Club and National Honor Society. These service opportunities have grown into learning experiences for Harrison Prep students in many different ways including Senior Projects, Job Shadows and more.

High School and Beyond Plan

The State of Washington requires that, prior to graduation, every student complete a plan of action for the year after high school (Grade 13). This is a graduation requirement.

Below are opportunities to support the creation of a High School and Beyond plan. Selection of course work should be based on an appraisal of student ability, attitudes, interests, and needs.

Financial Aid/Scholarships

Financial aid is available from most colleges and vocational-technical institutes. By completing the proper forms, you become a candidate for all forms of aid for which you qualify at the college, university, or technical college of your choice. Your parents must file a Free Application for Federal Student Aid (FAFSA) with the College Scholarship Service in Princeton, NJ, to qualify for consideration. Most of the aid funds are limited to those students who demonstrate financial need in order to attend college. In all cases, the student and family will be expected to contribute what they can. See your counselor for details about the financial aid process. The FAFSA must be filed as soon as possible after January 1 of the year the student plans to enroll in college.

You may apply for a Pell Grant by completing the FAFSA mentioned above. There are also some scholarships awarded by local organizations and regional or national competitions. When notices of these scholarships are received, they will be announced in the daily bulletin. Many of these are also granted on the basis of financial need.

The Washington Application for State Financial Aid (WASFA) is for people who don't file a federal FAFSA application. People who complete a WASFA are applying for state aid. There are various reasons to complete a WASFA instead of a FAFSA:

- A person may not be eligible for federal aid due to:
 - Citizenship or immigration status, including being undocumented.
 - Defaulted federal student loans.
 - Repayments owed on federal grants.
- A person may choose not to apply for federal aid due to:
 - Family members who do not want to file the FAFSA.
 - Other personal reasons.

After you complete the WASFA, the college(s) or program(s) you choose will determine whether you meet state residency requirements and state financial aid eligibility. State financial aid could include Washington College Grant, the College Bound Scholarship, Passport to Careers, National Guard Grant, or State Work Study. Please visit <https://wsac.wa.gov/> for more information.

Job Shadow

During their junior year, students are required to complete a six-hour job shadow in the career field that aligns with their HSBP. Students and parents should work with the high school counselor for more information about this graduation requirement.

Service Learning

Students must earn five (5) hours of Community Service per school year in attendance at CPSD as one

of their graduation requirements. Students may begin to earn these hours once they complete their eighth (8th) grade year. The five hours may be earned all at one time, or in any manner that meets the student's schedule, during each of his/her high school years, but must be completed prior to the student's participation in a commencement ceremony and the granting of a diploma.

Community Service is any service that is done for non-profit agencies and organizations and/or religious organizations. School service is also included. To assure that the service is appropriate for this requirement, refer to the guidelines on the Verification of Community Service Form. If students have a problem with locating an agency or finding a way to meet this requirement, they should work with their counselor.

Standardized High School Transcripts & Diploma Awards

High school students need to know that future employers may request to see transcripts and that the decision to release them can be an important part of the process of applying for employment.

International Baccalaureate Programme

The International Baccalaureate (IB) is Harrison Preparatory School's signature program.

Why offer the IB Program as a program of choice in the Clover Park School District?

Research shows that students participating in the MYP IB Program:

- Build confidence in managing their own learning;
- Learn by doing, connecting the classroom to the larger world;
- Outperform non-IB students in critical academic skills;
- Consistently have greater success in IB Diploma Program examinations;
- Thrive in positive school cultures where they are engaged and motivated to excel; and
- Develop an understanding of global challenges and a commitment to act as responsible citizens.

Linking the MYP to other IB programs

As of February 2015, Harrison is an authorized IB Diploma Programme School and will begin offering DP courses starting in the 2015-16 academic year. The IB Diploma Program is for students aged 16-19 (grades 11 and 12), and the MYP will serve as preparation for the internationally renowned DP program.

What is the Diploma Programme?

The DP curriculum is made up of six subject groups and the DP Core. Each class is a 2-year continuous course at the end of which students take an exam. These courses teach students to think deeply about the subject matter and to see connections between all disciplines.

In addition to the six subject groups, students who commit to pursuing the full IB diploma will have access to the Core, comprised of a class called Theory of Knowledge (TOK) as well as participating in Creativity, Action, Service (CAS) and the Extended Essay (EE). Through the DP Core, students reflect on the nature of

knowledge, complete independent research and develop projects that reflect their understanding of Creativity, Action, and Service.

Diverse Learning: Students take at least 50 hours of coursework in the following eight subjects to learn about the importance of all disciplines.

- Language acquisition (Spanish starting in sixth-grade)
- Language and Literature (English)
- Mathematics
- Arts (Choir and Visual Arts)
- Design (Technology)
- Sciences
- Individuals and Societies (Social Studies)
- Physical and Health Education

Who can take DP courses?

The DP is open to any student aged 16 to 19 at schools, like Harrison Preparatory that have been authorized to implement the program, provided that they've taken and been successful in all prerequisite courses.

Students will have two options within the Diploma Programme:

1. To become a Diploma Candidate and possibly earn an IB diploma in addition to the CPSD high school diploma; or
2. To become a Certificate Candidate. These options allow for some flexibility depending on the level of challenge that a student wants to undertake.

Middle Years Programme (MYP)

The IB Middle Years Programme is the framework for instruction in grades 6-10.

- Teachers use IB criteria to assess work within their subject areas.
- Students in grades 6-10 take courses in all eight subject areas.
- In the 10th grade, students complete an exhibition of their learning called the Personal Project.

Areas of Interaction (AOI)

The MYP model is a curriculum framework based on the idea that all knowledge is connected. Teachers emphasize this idea through the Areas of Interaction. These five areas are meant to help students see the inter-connectedness of their subjects. The five areas are as follows:

- **Approaches to Learning (ATL):** Skills to help students become more independent in their learning;
- **Human Ingenuity (HI):** The idea that humans are creative and that creations have consequences;
- **Health and Social Education:** Inquiry into a range of issues including social, emotional, intellectual impacts on different cultural settings;

- **Community and Service:** Helping students apply their learning to the community around them; and
- **Environments:** Looking at all surrounding conditions and the impact we have on them and that they have on us.

Learner Profile

All students will become familiar with and we hope value the IB MYP Learner Profile traits as they become a part of the Harrison Prep community. The traits and their descriptions are as follows:

Inquirers

- develop natural curiosity
- get the skills needed to do research
- show independence in learning
- actively enjoy learning
- become a life-long learner

Knowledgeable

- explore concepts, ideas and issues with local and global importance
- explore information or content areas deeply
- develop understanding across all subject areas

Thinkers

- apply thinking skills critically and creatively to problem-solving
- recognize complex problems
- make reasoned, ethical decisions

Communicators

- understand and express ideas/information confidently
- express ideas/information in more than one language
- uses a variety of modes of communication
- work effectively and willingly in collaboration with others

Principled

- act with integrity and honesty
- has a strong sense of fairness, justice and respect for the dignity of the individual, groups, and communities
- take responsibility for their own actions and consequences that come with those decisions

Open-Minded

- understand and appreciate personal histories and cultures
- open to perspectives, values and traditions of other individuals and communities
- seek out and evaluate a range of points of view
- willing to grow from the experiences had when encountering other perspectives

Caring

- show empathy, compassion, and respect towards the needs and feelings of others
- have a personal commitment to service
- act to make a positive difference to the lives of others and environment

Risk-takers

- approach unfamiliar situations and uncertainty with courage and thinking ahead
- have the independence of spirit to explore new roles, ideas, and strategies
- defend beliefs with bravery and articulation

Balanced

- want to achieve personal well-being for self and others
- understand the importance of intellectual, physical, and emotional balance

Reflective

- give thoughtful consideration to own learning and experience
- assess and understand strengths and limitations
- know how to support own learning and personal development

High Expectations

Teachers will engage in instructional practices that research has proven to yield high performance for all students. Student work will be meaningful, engaging and rigorous.

Expectations for post-secondary education will be embedded in the curriculum from the beginning. Students explore career opportunities, build a personal portfolio and participate in an early college awareness program.

Personalized

Harrison Preparatory is a small school where students have a better opportunity to be known by staff members. Class sizes are not smaller, necessarily, but the experience is very supportive. We provide many opportunities to support students' learning and progression like Learning Assistance Programs (LAP) during school and assistance during lunch and after school in extending learning opportunities.

Harrison Preparatory School Courses

CTE - Arts, A/V Technology & Communication

AUDIO VIDEO TECHNOLOGY II A -927109

Inquiry and problem-solving are at the heart of the subject. DP design technology requires the use of the design cycle as a tool, which provides the methodology used to structure the inquiry and analysis of problems, the development of feasible solutions, and the testing and evaluation of the solution. A solution can be defined as a model, prototype, product or system that students have developed independently. DP design technology achieves a high level of design literacy by enabling students to develop critical-thinking and design skills, which they can apply in a practical context. While designing may take various forms, it will involve the selective application of knowledge within an ethical framework Credit for Graduation: CTE or Art

PREPRESS/DESKTOP PUBLISHING A - 927100

This course involves marketing advertisements, writing stories, captions, headlines, planning layouts, photography and learning teamwork. We work with minute details and precise deadlines on yearbook. The yearbook is produced on the computer. Once the yearbook is produced, students will have the opportunity to create a variety of school, business and personal publications. Learn software programs to create professional quality documents from a number of desktop publishing. The first three quarters of this course are dedicated to yearbook with the last quarter dedicated to desktop publishing. The final result is the pride and pleasure of producing the school's annual.

MICROSOFT OFFICE CERTIFICATION III - 653335

Microsoft Office Certification 3 provides instruction toward additional Specialist Certifications. This course teaches the competencies for Access and Outlook. Skills gained in Access include entering and editing data, building tables, building forms, creating and managing queries, and designing reports. Students will demonstrate the efficient use of email software by creating and formatting Outlook items, managing email messages, managing contacts, organizing calendar objects, and working with tasks and notes. Upon completion of each unit, students will take the Microsoft Office Specialist Certification tests. Students who pass four specific tests earn Microsoft Office Master Certification. IB DP Language and Literature 2- 010113/14

This is the second level course for IB DP Language and Literature. In this course, students study a wide range of literary and non-literary texts in a variety of media. By examining communicative acts across literary form and textual type alongside appropriate secondary readings, students will investigate the nature of language itself and the ways in which it shapes and is influenced by identity and culture. Approaches to study in the course are meant to be wide ranging and can include literary theory, sociolinguistics, media studies and critical discourse analysis among others.

IB LITERATURE HL I A - 010071

Through the study of a wide range of literature, the language A: literature course encourages students to appreciate the artistry of literature and to develop an ability to reflect critically on their reading. Works are studied in their literary and cultural contexts, through close study of individual texts and passages, and by considering a range of critical approaches. The study of works in translation is especially important in introducing students, through literature, to other cultural perspectives. The response to the study of literature is through oral and written communication, thus enabling students to develop and refine their command of language. Credit for Graduation: English

HEALTH AND FITNESS - 506202

High school health integrates a variety of health concepts, skills, and behaviors to plan for personal and lifelong health goals. Students develop skills that will make them health-literate adults. These include awareness and consequences of risky behaviors, disease prevention, overall wellness, and identification of community health resources. Students are taught how to access accurate information that they can use to promote health for themselves and others. Their behaviors reflect a conceptual understanding of the issues associated with maintaining good personal health. Students demonstrate comprehensive health and wellness knowledge and skills. They use problem-solving, research, goal-setting and communication skills to protect their health and that of the community. Credit for Graduation: Health

WEIGHT TRAINING/CONDITIONING - 500411

This semester long course will help students explore, practice, and learn to enjoy weight training and various conditioning exercises to promote their individual fitness goals. Students will learn how to prepare their bodies and minds of exercise, safe weight room conduct, anatomy and physiology of exercise, as well as weight training myths. Credit for Graduation: Fitness

Mathematics

ALGEBRA I A - 300101

Algebra I is the first year in a three year college prep math sequence. Algebra I focuses on the structure of the real number system and examines symbolic representations in solving real-world problems. Linear functions, quadratic functions, systems of equations, statistics, and problem solving are investigated.

Graphing, both as a means of displaying data and analyzing data in one or two dimensions, is an integral part of this course. Review is built into every section and unit of study. A sound foundation in arithmetic and pre-algebra skills is essential for success in this course. Credit for Graduation: Mathematics

ALGEBRA II A - 301103

Algebra II is the third year in a three-year sequence of high school mathematics. This course will cover linear functions, quadratic functions, polynomial functions, exponential and logarithmic functions, radical functions and rational functions. The real number system is extended to include complex numbers. All topics are studied from an algebraic, graphical, numerical and exploratory approach. An emphasis on applications and appropriate calculator use will be integrated throughout the year. Credit for Graduation: Mathematics

IB Math Analysis and Approaches 1A-021321

The IB DP Mathematics: analysis and approaches course recognizes the need for analytical expertise in a world where innovation is increasingly dependent on a deep understanding of mathematics. The focus is on developing important mathematical concepts in a comprehensible, coherent and rigorous way, achieved careful balanced approach. Students are encouraged to apply their mathematical knowledge to solve abstract problems as well as those set in a variety of meaningful contexts. Mathematics: Analysis and approaches has a strong emphasis on the ability to construct, communicate and justify correct mathematical arguments. Students should expect to develop insight into mathematical form and structure and should be intellectually equipped to appreciate the links between concepts in different topic areas. Students are also encouraged to develop the skills needed to continue their mathematical growth in other learning environments. Math Analysis 1: This course will give students a strong background in the precalculus skills required to apply the techniques of calculus with and without technological assistance. The course will also provide students the needed skills to handle data sets and make conclusions about data in our data rich world.

IB Math Applications and Interpretations 1A-021311

The Math Applications and Interpretation course recognizes the increasing role of mathematics and technology play in a diverse range of fields in a data-rich world. As such, it emphasizes the meaning of mathematics in context by focusing on topics that are often used as applications or in mathematical modelling. To give this understanding a firm base, this course includes topics that are traditionally part of a pre-university mathematics course such as calculus and statistics. The course emphasizes the use of technology as well. Math Applications 1: As a course focuses on providing students with strong skills in function recognition and evaluation. Helping students understanding what functions are useful for modelling real world situations. Additionally the course focuses on data literacy in the first year to help student develop analysis skills when working with one and two variable data sets.

LEADERSHIP

This year course is open to 6th, 7th, and 8th grade students who want to serve the school community while developing their own leadership skills. Leadership skills are both learned in the classroom and refined through practice. Therefore, this course will include two parts: classroom lessons and school projects. Leadership skills such as goal setting, time management, decision making, meeting procedures, communication, organization, public speaking and interpersonal relations will be developed through instructional activities and assessments. Students will put these skills into practice through direct planning and implementation of school projects. Students will reflect on their skill development to identify growth and areas for improvement.

DIGITAL COMMUNICATION TOOLS

Digital Technology is a course that introduces 7th and 8th grade students to current computer-based training required for success in today's digital communication world. Instruction includes digital camera, internet-based software training in the basics of Word, PowerPoint, Excel, Digital Citizenship and research tools. This foundational course integrates skills in the core academic content of math and science with technology. Students use technology to collaborate, communicate, generate innovative ideas, investigate and solve problems. These skills will continue to be used throughout the students' school experiences.

MS Math

8TH GRADE MATH

This course addresses the Washington State Learning Standards for Mathematics by developing students' abilities to problem solve, reason, and communicate like mathematicians through the Standards for Mathematical Practice and focusing deeply on the Grade 8 Standards for Mathematical Content.

In 8th Grade, instructional time should focus on four critical areas: (1) deepening knowledge of the number system to include irrational numbers and rational approximations; (2) expressions and equations work with radicals and integer exponents along with proportional relationships, linear equations and systems of equations; (3) evaluation, comparison, and modeling of functions, and (4) geometry, including congruency, similarity, cylinders, cones, spheres, and the Pythagorean Theorem.

MS Music

ADVANCED CHOIR

Students continue their development of choral singing. 8th Grade Choir requires a commitment to more performances than Beginning or Intermediate choirs. The vocal technique and performance skills taught will lead students toward self confidence and growth as ensemble singers. Students perform more advanced and challenging literature and continue to develop music reading skills. This is a performance-based course which requires day and evening performances as an extension of the classroom activities.

Prerequisites

Full Year Prerequisite: Successful completion of Intermediate Choir or equivalent, as determined by the director. Auditions may be necessary.

Notes

This course can be multi-grades

BEGINNING CHOIR

Love to sing? Want to learn? Join us! This class provides an introduction to choral music. Students will learn to sing a variety of choral literature and styles from around the world in unison, and in two- or three-part harmony. Musical concepts are taught in daily rehearsals with an emphasis on correct breathing and vocal techniques.

This is a performance-based course which requires day and evening performances as an extension of the classroom activities.

Prerequisites

Full Year Prerequisite: None

INTERMEDIATE CHOIR

Students continue their musical growth as ensemble singers with more opportunities for small group and solo singing. Musical concepts are taught in daily rehearsals with an emphasis on correct breathing and vocal techniques (diction, blend, balance, phrasing, intonation, articulation and tone quality), and music reading. This is a performance-based course which requires day and evening performances as an extension of the classroom activities.

Prerequisites

Full Year Prerequisite: Successful completion of Beginning Choir or equivalent, as determined by the director.

MS Physical Education

PHYSICAL EDUCATION - 6TH GRADE

Students in grade six will combine fundamental skills into more complex movement forms in modified game, rhythmic activities, and recreational activities. The goal of this class is for students to improve their fitness and further develop fundamental sports skills to allow them to successfully participate in various games and activities. Highlights of the course include:

- Fitness Development
- Skill Development
- Fitness & Health Education
- Social Skill Development

Grades

6

Schools

Harrison Preparatory School
Hudtloff
Lochburn
Thomas

PHYSICAL EDUCATION - 7TH GRADE

In grade seven, students continue to develop competence in modified versions of various games, and recreational activities. They can apply similar concepts from one sport or movement setting to another.

Students continue to develop responsible personal and social behaviors by demonstrating decision making skills, conflict-resolution skills, appropriate etiquette, and respect for others. Highlights of the course include:

- Fitness Development
- Skill Development
- Fitness & Health Education
- Social Skill Development

PHYSICAL EDUCATION - 8TH GRADE

In grade eight, students demonstrate competence in skillful movement in modified game situations and a variety of recreational activities. They transition from modified versions of movement forms to more complex applications across all types of activities. Students set goals, track progress, and participate in activities to improve health-related fitness. Highlights of the course include:

- Fitness Development
- Skill Development
- Fitness & Health Education
- Social Skill Development

MS Science

SCIENCE - 6TH GRADE STEM

In this year-long course, students will focus on some of the key disciplinary core ideas in Physical, Earth and Space, and Life Science concepts and processes as outlined in the Washington State Science Learning Standards. Students will have the opportunity to explore the science and engineering practices, as well as the cross cutting concepts, that allow us to answer questions and solve problems. Students will be provided hands-on activities in the laboratory, class discussions, individual and group projects and activities, and opportunities to investigate science topics of relevance to their own lives to enhance their understanding of essential learning in science.

SCIENCE - 8TH GRADE STEM

In this year-long course, students will focus on some of the key disciplinary core ideas in Physical, Earth and Space, and Life Science concepts and processes as outlined in the Washington State Science Learning Standards. Students will have the opportunity to explore the science and engineering practices, as well as the cross cutting concepts, that allow us to answer questions and solve problems. Students will be provided hands-on activities in the laboratory, class discussions, individual and group projects and activities, and opportunities to investigate science topics of relevance to their own lives to enhance their understanding of essential learning in science.

The course is supported by students' concurrent enrollment in mathematics that includes fundamentals of algebra. While algebraic treatment is not the focus, students have an opportunity to apply the math they are learning to the physics concepts studied. Computer simulators of systems to study the laws of physics are used extensively.

MS Social Studies

SOCIAL STUDIES: ANCIENT WORLD - 6TH GRADE

In sixth grade, students deepen their understanding of the Earth and its peoples through the study of history, geography, politics, culture, and economic systems. Students begin their examination of the world by exploring the location and spatial organization of the world's major regions. This exploration is then followed by looking at world history from its beginnings. Students are given an opportunity to study a few ancient civilizations deeply. In this way, students develop higher levels of critical thinking by considering why civilizations developed where and when they did and why they declined. Students analyze the interactions among the various cultures, emphasizing their enduring contributions and the link between the contemporary and ancient worlds.

SOCIAL STUDIES: U.S. HISTORY -DISCOVERING OUR PAST - 8TH GRADE

In eighth grade, students develop a new, more abstract level of understanding of social studies concepts during their study of U.S. history and government, 1776 to 1900. Students explore the ideas, issues, and events from the framing of the Constitution up through Reconstruction and industrialization. After reviewing the founding of the United States, particularly the Constitution, students explore the development of politics, society, culture, and economy in the United States to deepen conceptual understandings in civics, geography, and economics. In particular, studying the causes and consequences of the Civil War helps them to comprehend more profoundly the rights and responsibilities of citizens in a culturally diverse democracy.

SOCIAL STUDIES: WASHINGTON STATE HISTORY - 7TH GRADE

In seventh grade, the second part of the year asks students to bring their understanding to their world today as they examine Washington State from 1854 to the present. The study of Washington State includes an examination of the state constitution and key treaties. While these two contexts may be very different, the purpose of studying these different regions and eras is the same: to develop enduring understandings of the core concepts and ideas in civics, economics, geography, and history.

IB DP Spanish Language & Literature 2 010123/24

This is the second level course of IB DP Spanish Language & Literature. In this course, students study a wide range of literary and non-literary texts in a variety of media. By examining communicative acts across literary form and textual type alongside appropriate secondary readings, students will investigate the nature of language itself and the ways in which it shapes and is influenced by identity and culture. Approaches to study in the course are meant to be wide-ranging and can include literary theory, sociolinguistics, media studies and critical discourse analysis among others.
